

MONTHLY REVIEW

Lynx was profitable in August as gains in commodities, fixed income and equities more than offset losses in foreign exchange. Persistent inflation pressures, elevated energy prices and changing expectations for monetary policy continued to drive prices across asset classes. Within commodities, long positions in the crude oil complex and natural gas benefited from disruptions to Middle Eastern supply and continued uncertainty surrounding flows through the Strait of Hormuz. Gold was supported by declining real-rate expectations, concerns surrounding US fiscal dynamics and continued central-bank demand. In fixed income, short positions in US and European short-term interest rates performed well as market participants continued to reassess the timing and direction of future monetary policy. Short Japanese government bond positions also contributed positively as prices fell on growing expectations for further Bank of Japan tightening. In equities, renewed strength in semiconductor and AI-related demand contributed to gains in Taiwan, Singapore and Korea, while long positions in the DAX, TOPIX and Euro Stoxx indices were also profitable. Foreign exchange was the only asset class detractor, with losses concentrated in short positions in the Canadian dollar, euro and Korean won. Exchange rates were particularly volatile as expectations for monetary policy diverged across regions.

GROSS ATTRIBUTION BY ASSET CLASS, %^{3,4}

ABOUT US

Headquartered in Stockholm, Sweden, Lynx Asset Management was founded with the conviction that a systematic approach was optimal to capitalize on the broadest set of investment opportunities. Since 1999, Lynx has developed and implemented innovative and differentiated proprietary algorithms to invest actively in global equities, fixed income, commodities and currencies. With a broad set of systems and trading concepts, we attempt to meet the goals of our investors by offering a combination of established investment programs and customized solutions. And, as has been the case throughout our history, we are developing dynamic new models to take us into the next generation.

THE PROGRAM

The Lynx Program is our original strategy, launched in May 2000. It is a diversified managed futures strategy that aims to deliver high risk-adjusted returns and attractive portfolio characteristics. The core of the program is systematic trend-following, complemented by diversifying models, including quantitative macro and machine learning-based approaches, aimed at enhancing performance in non-trending market environments. The program trades derivative markets across fixed income, currencies, commodities, and equity indices, and aims to identify opportunities across multiple time horizons, with holding periods ranging from a few days to over a year.

RISK MANAGEMENT

Risk management is an integrated feature in the investment process. The models operate independently and the portfolio is constructed based on the signals from each model. Individual models apply systematic risk-reducing mechanisms to minimize losses resulting in a dynamic utilization of the risk budget across the portfolio over time. Value-at-Risk is used to limit position concentration and aggregated risks; limits are applied on the instrument, asset class and total portfolio level.

VALUE AT RISK BY ASSET CLASS AND TOTAL PORTFOLIO, %^{2,4}

EXECUTIVE SUMMARY

Strategy	Global managed futures (CTA)
Approach	Systematic, directional, trend following
Instruments	Fixed income, equity index and commodity futures; currency futures and forwards; interest rate swaps
Targets	Volatility: 18% p.a. before fees Return: High risk-adjusted return Correlation: Low or negative with stock markets
Team	Around 100 employees, the majority within research, system development and trade execution.

KEY POINTS

Management fee	1% p.a.
Performance fee	20% over hurdle rate and HWM
Liquidity	Monthly (documentation and payment due 3 banking days before dealing day)
Minimum investment	SEK 500,000
Custodian	SEB
Administrator	SS&C Financial Services (Ireland) Ltd.
Auditor	KPMG AB
Inception date	1 May 2000

The figures presented are estimates calculated by Lynx Asset Management AB. **1)** The net performance figures include interest, costs and fees and reflect the Lynx Fund with a 1% management fee and a 20% performance fee. Index-figures are based on available data at the time of publication and are subject to revision. **2)** The Value at Risk (VaR) is measured using a 1-day, 95% confidence interval. VaR is measured with three models capturing different time horizons and the highest risk figure is presented. **3)** Gross return excludes interest on unencumbered cash. **4)** Based on daily data for the past 12 months.

IMPORTANT INFORMATION

This document is strictly confidential and may not be copied or forwarded without written permission from Lynx Asset Management AB.

Lynx is a special fund as defined in Chapter 1, Section 11 of the Act (2013:561) on managers of alternative investment funds. This material shall not be regarded as investment advice. An investor considering investing in the fund should carefully read the fund's simplified prospectus, subscription document and the information memorandum containing the fund rules. These documents are available for download at www.lynxhedge.se.

Investing in funds is associated with risk. **Past performance is no guarantee of future return.** The value of the capital invested in the fund may increase or decrease and investors cannot be certain of recovering all of their invested capital. The returns are not adjusted for inflation. The fund has no investments in hard-to-value assets for which no market pricing information is available, e.g. some unlisted/private equity, or model priced instruments for which no industry standard software models are available, e.g. complex, structured, one-off contract.
