MONTHLY REPORT - THE LYNX FUND (SEK)

31 JULY 2026

MONTHLY REVIEW

Lynx generated a loss in July, its first negative month of 2026, due to declines in equities and foreign exchange; fixed income and commodities were largely flat. Expectations for the path of global monetary policy again played a significant role in markets as investors weighed resilient economic activity, persistent inflation concerns and easing geopolitical risks. Although the Fed left rates unchanged, policymakers maintained a hawkish bias and investors continued to price in a meaningful probability of tightening later in the year. Equities were the largest detractor as technology-heavy markets came under pressure when investors reassessed stretched valuations after a strong first half. The largest losses came from long positions in the KOSPI, NASDAQ, Hang Seng and Taiwan indices. Foreign exchange also weighed on performance, mainly through long US dollar exposure, most notably against the Korean won, euro, Canadian dollar and Japanese yen. Within commodities, gains were driven by long positions in gas and petroleum products, as prices reflected tighter inventories and refining challenges. These were largely offset by losses on short positions in agricultural markets, including corn, wheat and soybeans. Fixed income was broadly neutral, and the program turned net short during the month as bond yields rose.

ABOUT US

Headquartered in Stockholm, Sweden, Lynx Asset Management was founded with the conviction that a systematic approach was optimal to capitalize on the broadest set of investment opportunities. Since 1999, Lynx has developed and implemented innovative and differentiated proprietary algorithms to invest actively in global equities, fixed income, commodities and currencies. With a broad set of systems and trading concepts, we attempt to meet the goals of our investors by offering a combination of established investment programs and customized solutions. And, as has been the case throughout our history, we are developing dynamic new models to take us into the next generation.

THE PROGRAM

The Lynx Program is our original strategy, launched in May 2000. It is a diversified managed futures strategy that aims to deliver high risk-adjusted returns and attractive portfolio characteristics. The core of the program is systematic trend-following, complemented by diversifying models, including quantitative macro and machine learning-based approaches, aimed at enhancing performance in non-trending market environments. The program trades derivative markets across fixed income, currencies, commodities, and equity indices, and aims to identify opportunities across multiple time horizons, with holding periods ranging from a few days to over a year.

RISK MANAGEMENT

Risk management is an integrated feature in the investment process. The models operate independently and the portfolio is constructed based on the signals from each model. Individual models apply systematic risk-reducing mechanisms to minimize losses resulting in a dynamic utilization of the risk budget across the portfolio over time. Value-at-Risk is used to limit position concentration and aggregated risks; limits are applied on the instrument, asset class and total portfolio level.

EXECUTIVE SUMMARY

Strategy	Global managed futures (CTA)
Approach	Systematic, directional, trend following
Instruments	Fixed income, equity index and commodity futures; currency futures and forwards; interest rate swaps
Targets	***Volatility:*** 18% p.a. before fees ***Return:*** High risk-adjusted return ***Correlation:*** Low or negative with stock markets
Team	Around 100 employees, the majority within research, system development and trade execution.

KEY POINTS

Management fee	1% p.a.
Performance fee	20% over hurdle rate and HWM
Liquidity	Monthly (documentation and payment due 3 banking days before dealing day)
Minimum investment	SEK 500,000
Custodian	SEB
Administrator	SS&C Financial Services (Ireland) Ltd.
Auditor	KPMG AB
Inception date	1 May 2000

The figures presented are estimates calculated by Lynx Asset Management AB. **1)** The net performance figures include interest, costs and fees and reflect the Lynx Fund with a 1% management fee and a 20% performance fee. Index-figures are based on available data at the time of publication and are subject to revision. **2)** The Value at Risk (VaR) is measured using a 1-day, 95% confidence interval. VaR is measured with three models capturing different time horizons and the highest risk figure is presented. **3)** Gross return excludes interest on unencumbered cash. **4)** Based on daily data for the past 12 months.

IMPORTANT INFORMATION

Lynx is a special fund as defined in Chapter 1, Section 11 of the Act (2013:561) on managers of alternative investment funds. This material shall not be regarded as investment advice. An investor considering investing in the fund should carefully read the fund's simplified prospectus, subscription document and the information memorandum containing the fund rules. These documents are available for download at www.lynxhedge.se.

Investing in funds is associated with risk. **Past performance is no guarantee of future return.** The value of the capital invested in the fund may increase or decrease and investors cannot be certain of recovering all of their invested capital. The returns are not adjusted for inflation. The fund has no investments in hard-to-value assets for which no market pricing information is available, e.g. some unlisted/private equity, or model priced instruments for which no industry standard software models are available, e.g. complex, structured, one-off contract.
